Subject: Problem with new CP

After downloading CP2, everything worked fine UNTIL I turned off my computer and turned it back on. When going to Renegade and into any server, I find I am "stuck in place" as if I am the 1st to enter a server and waiting for a 2nd player to join. I can turn left or right, crouch, spin 180 degrees, change weapons, reload, but can't move left or right, jump, go forward or backwards. This happens on my custom keyboard setting (options>controls). When I use the default settings I can move normally, but being left handed I use the mouse in my left hand and the keypad for my controls. When I go back to the custom settings, I get the results described above.

I have reinstalled Renegade and Renguard. If I uninstall Renguard, and enter Renegade, it works! When I reinstall Renguard and enter Renegade it works! If I turn off the computer then turn it back on, enter Renegade, it doesn't work!
Any help with this would be appreciated.
TIA,
Joe
