Your sure you have the correct date? That one you just posted is in a weeks time today. Anyway the RenAlert mod is still progressing well. Only a few days ago they asked me about using the helipad scripts so that shows signs of progress in the mod. Also you may have noticed that the scripts version 1.1.1 released less than 1 week ago contained scripts written by Dante specifically for the mod. Basically the thief and spy scripts. This mod should be good if people support it.
