Hey, I was downloading CP2 through renguard until an error window popped up. It mentioned "Old File not found. However, a file of the same name was \*blank\* found. No update since file contents do not match." Below, it mentioned "Now Patching data\CC\_Canyon.mix". I went to my Data file, the Canyon file does exist, and I don't think I did anything to it. Any ideas on what to do? Thanks.
