ROFL FUNNY PIC

Ok granted you dont have to wait for vchicles because there are none to be had all servers are infantry only!

I wish that I had a mac daddy comp so I could play Joint Operations in the highest quality with no lag whatsoever.

Also I still want to be able to play other games besides JointOps.

And I can still play lower quality games such as renegade and half life 1 n red alert n stuff.

(this should be good)

PS:My pen is HUGE!
