Me and alot/few other people keep getting the "game.exe" error saying its currupted and that we are cheating. The recent addition of the No CD renegaurd exe patch seems to be causing this problem and needs to be adressed. I dislike having to download and then reinstall constantly the game2.exe file just because of some error with renegaurd and the fact that it calls you a cheater worries and pisses some people off. I suggest you look into this before renegaurd starts "banning" people for something you released and making THEM pay YOU

That means you got banned for trying to exploit RenGuard with the name of username by using one of 2 blacklisted "game2modded.exe" files, that try to exploit a RenGuard bug that has been fixed months ago. This detection method is 100% legit and it has no false positives.

I don't believe it for a second considering the befor post. By saying the game2.exe is currupt for not even touching it is a false postitive. Fix it or more gammers will be angered
