The only way I see this working is if there's no mine limit...And if you're stupid...

Prox mines do about 5-30 damage to a vehical. That means with a standard mine limie of 30, you still won't kill a mammoth tank. Poor bastard.

It's not worth the time to mine your APC when you could be doing something worthwhile, like attacking or fixing a building or repairing the harvester or doing ANYTHING PRODUCTIVE TO THE TEAM.
