Titan_HQ wrote on Thu, 23 March 2006 15:14: Is there anyway i can create an installer for my mod. There will be quite a few files to put into the renegade folder and it would be easier for people who download it to have an installer with options so they can decide which parts of the mod they want to install. e.g, they might not want loading screens, movies etc.. so an installer would make it easier to choose.

Nullsoft is a good choice and it's free (unless you are dealing with SS stuff on Linux, on Linux you use Autoconf/Automake)
