
Subject: [Suggestion] Auto-command entry

Something I would like to see is that RenGuard/launcher would automatically initiate "client_physics_optimization 1" client command when Renegade has launched. It gets a little tiring sometimes to have to enter it (regardless of the shortcut of just pressing "c" and enter). Maybe a feature like this could be added?

Possibly adding -client_physics_optimization 1 or +client_physics_optimization 1 to the shortcut launcher might be a way to accomplish it?
