How do you make PT icons? I have made a A10 flyable and I noticed it doesn't have a PT icon (not an official one anyway). I was just wondering how you get that yellow glow affect around the object in the PT icon. I'm newb at photo editing so I don't know where to start. I wish to create my own PT icons and then make then look as good as possible and near as to the official ones.

Thanks
