I run a GF4 Ti 4200 64MB and I don't have those issues. I play at 1024x768 with full detail and my FPS only drops down to about 30 minimum, and thats on volcano.

So, sorry, but the card isn't the issue by itself.

Try playing in a full 40 players server (which btw I don't do myself because it is just stupid).
