Lijitsu wrote on Sun, 16 April 2006 01:17: No no, it's possible with all 4 of them, 5 if you count after the ban which could've been C4 like three of the kills might've been, GDI rifles do 20 damage per shot, yes? Or is it 10 per shot and 20 per headshot? Either way, in ten seconds time, it is possible with a GDI rifle to kill 3 people with headshots, wound another, and finish him off with the pistol. And how do you know that those people hadn't been idiots and ran straight towards him without moving to the side at all? There are so many factors that could've come into play here that it's completely possible.

However, the Harvester with one hit thing, unless it's life was down THAT low, does mark him. I'm not saying he wasn't cheating, I'm saying that it is completely possible for him to do that.

You keep speculating things that aren't even shown in the SS. Where is there any smoke from this C4 in the ss? It'd still be lingering around if there were one. Also, he is the minigunner holding a pistol in the SS ... WAY to far away to be throwing any effective C4. Not to mention, the person who banned him was in IRC, where most bots these days show kill messages, usually showing what the player was killed by. Having said that... not one person said on the SS that it was C4 that got them. Including the person who died in the SS that is posting it. Even you yourself said he is holding a pistol in the SS.

And it's highly unlikely, almost impossible for those 4-5 players running around their base with that low of health to make it even remotely possible that this player can kill 4-5 players with a pistol in 10 seconds or less. Which is what they would have had to have been doing for this to even be possible. There is no way he could have killed 4-5 players (most from full health) with neither a rifle OR a pistol in 10 seconds or less. If they are running in a straight line or not.

It's already been proven that your theory is wrong... So stop trying to push it.
