Great thanks a lot it works now! Just one problem with my server and im not sure if this happens just to me or every one else in the game. When I join the first game when the server starts the game always shutdown and goes to the next map. On the 2nd map I am not able to see any purchase terminals and none of the biuldings have any healths bars or anything. 3rd map works fine but I guess its kinda annoying for me at the start. This has happened to me before but i forgot how I fixed it.
