If you attempt to justify ANYTHING with religion I just lost all respect for you and no longer care what you think. Religion is a spineless factless moronic excuse for those who don't have a real argument or used by the just plain nuts people like that lady, her dad and the rest of her very shallow gene pool family. There is nothing more sick than playing games at the expense of the people who died to let you act like a fucktard. For the record she should be put to sleep.
