Actually, right now, in BC only the transport chopper lets you parachute from it, even though it's possible to do so from the orca/apache (it's just disabled). If you're a passenger, type !p in teamchat and you'll paradrop out 1 second afterward. If you're the pilot, type !p and all your passengers (but not you) will be force paradropped. Also, if your trans goes <= 20something before it dies, it'll auto eject everyone, including the pilot. While parachuting, you can shoot and be shot at, so be aware.
