starts banging his head

Ok, i don't care a whole lot if you're polite to me or not, i'm just asking you to be that to other modders. You don't have to.

Now, there is only one thing that is annoying me, just this one thing, 50% or more of the community that, when sees a new idea, thinks it's impossible. All I ask is that stop because about the only thing you can't do is edit the GUI.....which actually you can to a small degree, but smaller then what most of us would like (but it's not like we really need new GUIs).

Swear at me alll you want. I'm just asking ease on the flames so people to don't take motivational dips. I understand, and would be to, upset if they promise something and then don't deliver it. That you can be upset about (although not like I can stop you). I'm just asking ease on the flames. It gives motivational dips. Kinda like what you're saying in that cinematic post, ACK, about RenAlert. That's kinda like what's caused, you start wondering what the point of continuing is because if you make a tiny mistake, you're pounced on till you're nothing but ashes.

Now if I sat here bragging "Oooh!! D000ds!!!! I g0t this c00000l thing!!!!!! It'll be ouutt in a month!!! It's 10 bases on ooneeeee maap!" and then a month later I said I couldn't do it, yea I'd say flame me like heck. Which is why I mainly just say i am going to make a mod and give it out but i'm not going to give all the specific details just incase. That's why it looks like I'm not doing lots, cause I'm not spreading it out to the world incase I slip up or hype up everyone too much.

Anyhow, not like I can govern you guys, but flaming does get old after a while right?
