ok, still to do:
Document everything
Write changelog
Test anything still to be tested
2 Scripts HTMLGOD wanted for SWMOD
Write code to correctly send PT data over the network (when its changed for example or when a player first joins so they get the changes too)
Customizable compass
Customizable credits/time remaining
Customziable radar (how customziable it will be is unclear at this point)

If anything is dropped, it would probobly be the radar or maybe the compass/time remaining changes.
