Subject: BRenBot won't start?

---

Hi, I downloaded ss-cp1.3.tar.gz from <http://www.brenbot.com> and untarred it and installed.

The LFDS and Wrapper work absolutely fine, although when I start ./brenbot I get this error:

```
[prince@avalon Serverbrenbot141]$ ./brenbot
```

```
ERROR: Missing config file option(s): Qauth at script/brenbot.pl line 408, <$fh> line 94.
```

script/brenbot.pl is a directory/file that doesn't exist in my Serverbrenbot141 directory. Locate turns up nothing even after an updatedb.

Also Qauth in brenbot.cfg is in the config file, so I'm not sure which options it's missing.

Could anybody help me out or point me in the right direction?
