If you actually manage to throw remote c4 up into the air and make it land on you, if you do this enough, you will eventually become a suicide bomber!!!! Get an apc, or any other vehicle, when you see a target, well Im geussing that you'll know what to do.

Doing all that ^^ kills you, but if somebody else mines you either with proximity c4, or remote c4 it won't kill you! Plus you can do some damage.

What's The Thing That Terrists Yell Out Before The Blow Themsleves Up? Isin't it: Allah, or Allah Kuba???
