Yes, throw C4 all over yourself and run into an enemy unit to blow yourself up, as opposed to doing something useful, like:

- Destroying the enemy harvester
- Attacking some buildings
- Repairing some buildings
- Being tank support
- Even buying a nubjet and pointwhoring enemy tanks is a better use of time and credits

And don't have a friend coat you in proxys unless you want a very angry team. That's the worst use of proximity C4 I've ever heard, and it wastes your team's mine limit.
