---

Does anyone have a script or something, where it can record, How many kills each harvester gets each game, then in the br annouce have it tally up and say how many each teams harvy has got so far this week/month. (have it displayed in irc and game channel)

Also you know how Brenbot can report to the irc channel with information about who killed who, and with what troop, is there anyway to make it also say with what weapon?.

there just some questions ive collected from a few of my server mods.

thanks for any help that gets given
