Here is a program i made for creating renegade menu and other screen images.

Make your new menu picture 1024 x 1024, drag it onto the form and it will give you the image split on X and Y. (4 - 512 x 512 images)

Just resave them as .tga, and your good to go.

<http://www.oblivioninteractive.com/files/RenImage.rar>

Extracted .exe file is 3mb, not to worry, i just left some test images on the form so they got compiled into the exe.

This program requires vb 6.0 runtimes.
