Subject: Can't find server listings

Hi,
I was playing on Jelly Server like usual, and I get disconnected from the server (my internet was crappy that day). Once I got back to the server listings page I don't see any servers. So I restart Renegade hoping that the servers will show up. To my surprise they don't... I can't page people, join servers (obviously), or locate people. But they can page me, and join my server. I can also join the chatrooms. Please help,
