Merovingian wrote on Fri, 05 May 2006 11:59your connected to WOL.  
very few server are still up on WOL.

connect to XWIS and you will see more servers.

Your incorrect. There is no WOL anymore. Everything that used to point to WOL now points to XWIS, therefore he didn't connect to WOL.

However, XWIS had to do a restart, and so esentially there were 2 instances of XWIS. (old and new). You would be connecting to new, which will have all the servers that had restarted since new was made.

The other servers were all still on old, and once they restart they will be on new, so if you look now you should see more servers than before.
