CP2 is nice, and I'm personally glad I got it, but it shouldn't at all be mandated. The same for mappacks, though it would be nice to see more variety on servers.

Quite simply, if a person doesn't want something, they shouldn't NEED to get it. I want to play Renegade, therefore I have it. I want the faster load times, maps, etc. therefore I have them.

"hey wtf if u want to play renegade ull be FORCED to download/buy the game"

Of note is the fact that we HAVE Renegade already. Just because we had to buy/dl Renegade because we wanted to play it doesn't mean that we have to dl some mappack that we DON'T want.

And please, for the love of all that is, try and put a little more effort toward legibility.
