Ok, to play on servers just connect to wol and it will automatically download a patch, then you should be good to play on servers. There are map packs which you can get at [www.unrules.com](http://www.unrules.com) (the good ones anyway) and there is renguard from [www.renguard.com](http://www.renguard.com) which also has an optional "core patch" that is a 3rd party patch made by bhs (black hand studios) that fixes bugs and increased loading speeds.
