Homey wrote on Tue, 09 May 2006 17:49 Exactly, it's just like having a firewall, the pings are 996 on the server list, once you're in they're normal.

The pings being 996 is a flaw, that you can fix by getting the xwis tool, and resetting to WOL, instead of the XWIS servers, people have it because at 1 point you needed to be set to XWIS to connect. They fixed the problem, and you can too

Blazer, are you sure nothing else related to bandwidth changed with XWIS? Maybe the way the servers comm. , or something, because I was looking at some ss, and even then I had 50 ping on servers I now have 150 And nothing has changed on my part...
