I already know that Ace Combat 6 (or 7, depending on whether or not Namco considers Zero to be 6) is coming for the Playstation 3. If all goes well, I can expect three Ace Combat games for the PS3. Even playing one is worth the price, especially since I don't want to buy a Blue Ray player just like I didn't want to buy a DVD player... So I'll let my PS3 do it for me.
