Been playing Renegade [TFD] with no major problems unitl I installed Renguard today. Renegade opens up fine now, but with no text on the front page menu. I cannot proceed any further into the game because of this. I don't think there's any way anyone could deny that Renguard is causing this problem. Any suggestions?

Edit: Just removed Renguard from my PC and the text is back on the menus and everything is working normally.
