It's a choice between Wii and PS3 for me and, honestly, I think PS3 will turn out to be the winner. Sony can thank the Final Fantasy-series for that, they definitely won't be available on Nintendo's system. I'm a hardcore FF fan.

If they release FF XIII for PC I might have to rethink, but as of now, that's my case. The only "catch" Nintendo has to draw me with is the price and the controller (I'm not even sure about the latter), while PS3 has good graphics and many known good games.
