Hey guys,

I found this old version of Reborn:

<http://www.cnc-source.com/files//pafiledb.php?action=file&am p;id=332>

It still works, but a few comments..

1)You the renegade game cd to launch it, BUT i have found a no-cd fix so you don't anymore

2)The game is a total conversion mod with high quality new vechiles, characters and more.

3)I have also found updated scripts to work with reborn

4)The Ext. Renegade Config works with reborn

5)Some skins from renegade work with reborn (except character and vechile skins)

6)There is an actuall server from BRgaming.com that still runs, and they get people playing there everyday, so the mod is still active. The server has everything you would get in a real renegade server.

7)I am working on getting reborn to work with renguard, expect this very soon.
