Subject: how would i make an air strike?
Posted by GrayWolf on Mon, 22 May 2006 22:24:25 GMT

I want to make like 6 planes fly over at very high speeds and drop bombs on a tank and fly away.

Any Ideas on how to do that?

I know how to make helicopters fly and follow a way path but they go slow, even if i mod the planes to have very fast stats. Thats using the base patrol script is there another script i can use? And then how could i make them each drop a bomb or 2 during the flight and keep going? I want the planes to be blazing.
