A lot of the time I won't do what people say because they'll ask for crazy things. For example, it is not wise to rush Nod's base on Field when they have 3 tanks blocking you. It might work, but it probably won't and I don't feel like giving the field to Nod.

Another example might be APC rushes or flame tank rushes or whatever else. A team often times has a better chance of success just defending the field on particular base defence maps. You don't just gamble it by losing the field if you fail. Rush when they've got one vehicle or less or if you think they're all repairing in one building and not defending another.
