My game is from the First Decade yes.

But wait? I get messages that 2 of my maps aren't Windows made and every now and then Renegade shuts me from the game for "cheating". Tough deleting those files doesn't help. Even uninstalling and reinstalling it doesn't fix this.

I have a Renguard from 1 of the websites that you guys said... But still the same! And playing without Renguard??? Well, then most servers kick me of since I don't use it!
