Host file should look like this, its in system32/drivers/something

```
# Copyright (c) 1993-1999 Microsoft Corp.
```

```
#
```

```
# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
```

```
#
```

```
# This file contains the mappings of IP addresses to host names. Each
```

```
# entry should be kept on an individual line. The IP address should
```

```
# be placed in the first column followed by the corresponding host name.
```

```
# The IP address and the host name should be separated by at least one
```

```
# space.
```

```
#
```

```
# Additionally, comments (such as these) may be inserted on individual
```

```
# lines or following the machine name denoted by a '#' symbol.
```

```
#
```

```
# For example:
```

```
#
```

```
# 102.54.94.97 rhino.acme.com # source server
```

```
# 38.25.63.10 x.acme.com # x client host
```

```
127.0.0.1 localhost
```
