---

hey guyz n galz ... i have the following problem:

always if i try to start renegade with one of your scripts (version 2.1 and higher) i get this error

the scripts 2.01 and lower are working as far as i tested, but it would be good if i could use the new versions ...

specialy cuz i want to use the custom key binding stuff

i am using win xp prof (x64), all updates, latest drivers
