the best way for nod to rush in under is to go to the wf
(same for gdi=> strip)
they don't expect it and most of the time it isn't even mined.
get apc fill it and go
i've done it several time and most of the times it works.
they have no vehs so then you rush with flamers => no agt and then finish it off with sbh+nuke or
stank rushes

like i've said i've done it several times and it works
