D4rkFyre wrote on Sun, 04 June 2006 04:42 Not sure if it'd help but I use a TFT 17' so but I altered my Screen Monitor to 200Hz (By Right Clicking Desktop/Properties/Settings/Advanced/Monitor/ then change your Frequency ,thx to a friends help and my fps would rise to a much higher FPS but I'm not sure if it would work with yours. Just a suggestion.

Fyre

you do know this can lead to damaged hardware? increasing the refresh rate can seriously damage your graphics card or monitor. its not recommended.
