I trust you have a 4.0 GPA to flaunt about.

My advise is to spend wisely, maybe even purchase some used hardware. Now would be a good time, with AMD releasing a new socket PGA earlier this month. I know for me, I can enjoy playing games with a \$160.00 video card much more than with a \$500.00 card. If I spend \$500 on a video card I expect to get wet when I walk under the waterfall at Field.

lol No 4.0. I have a 3.73 GPA but a kickass ACT score. I've got 5500\$ set aside for money to have in college, and this 2200\$ is extra that I can use for a computer. Jaspah I've looked at those things. Lowest I can find is 650\$ for one of those. They look pretty nice but I don't know what to think about them. 650\$ is a lot for a video card... That's 1/4 the total price of the computer. Still an option. I just... I have this money and it's such a wonderful thought and I want to get the most out of it while still not sitting on my laurels for another year and keeping this money out of investment.
