Well, Ive been looking for a "box" and ive found teh one i want.
Only im not sure it will support (be good enough) for my needs...

This is it.

SERVER:

Pentium4 3.0

DISK SPACE:

1 X 80 GB SATA

RAM:

1 GB

BANDWIDTH:

1500 GB

Would this be good enough to host like 3 renegade servers, An TS Server, And about 2 IRC Bots?

If not i can upgrade to an P4 3.2 or P4 3.4 for \$20 more

Please i need some opinions
