AircraftkillerYou could try using the search function.

No one is here to bottle-feed you.

Some grade-a advice and help there ack, anyway.

Try <http://www.cncammo.com> for then, there hosted by Fileplanet, so you will need a gamespy account to download then you have to queue im afraid.

At the minute there are not a lot of good sites with downloads, dont worry that is soon to change..
:twisted:
