i understand you enthusiasm and i agree, nothing is impossible.

Thout keep in mind, modifying core stuff will take you a long time, years maybe...

EDIT/On a side note:

Be careful with your project, or you might get Foxed.

Quote:fox - v. [derived from 20th Century Fox Corporation, the first recorded company to cause a game's cancellation] 1. To cancel, recall, remove, or cease development of a video game project (particularly amateur video game "modifications") due to illegal and extensive (if not critical) use of well-known copyrights and trademarks. 2. To cause the cancellation, recall, or removal of a video game due to copyright infringement. -- foxed (adj.)
