Doitle wrote on Sat, 01 July 2006 12:21 Yeah I'm with Icedog. Reason is very newbie friendly. I suggest that you get Reason 3.0 and a CD series called "Producing Music with Reason". It teaches how to use the sequencer tracks and interface them with the instruments. Don't let the narrators gay lisp put you off, the tutorial is rock solid.

Yeah I got those video tutorials, they're nice. I haven't watched all of them, but I got a pretty basic understanding quite quickly from them. Also, the refills are really nice. Like analogue monsters, prop strings, and orkester.
