I just saw this movie. Scared me into a coma. The only movie that's ever scared me in any way. HIGHLY recommend it.

As far as the plot:

The back of the DVD coverIts name:Event Horizon. The high-tech, pioneering research spacecraft mysteriously vanished without a trace, on its maiden voyage seven years earlier. But a weak, persistant signal from the long-missing craft prompts a rescue team...

Oddly enough, there aren't any aliens in this movie. Yay!

Oh, and the cast is good. Laurence Fishburne from the Matrix and Sam Neil from Jurassic Park are in it. Buncha others.

If you don't plan on watching it, here's the spoilers and crap.
