Then you can edit certain options from this registry key. The option "IntroMovieSkipAllowed" if you double click it and change the value to "1" it will stop showing the intro movies.

"SkipAllIntroMovies" will skip all of them. Same with quit conformation, change

"SkipIngameQuitConfirmDialog" and "SkipQuitConfirmDialog" to "1" and they wont ask you if you want to quit when you do.

theres a modified config.exe to change those options as well
