Hi,

I'm not sure where to post this but I've got a bypasser to report.
Not exactly sure if it's allowed to post IP adresses and IRC logs, so I'll wait with that till someone tells me to post or to pass the info by a different method.

Player ingame name was: Tw34km3

Did one shot kills with every weapon, and also repaired vehicles from his team in an instant. He was running renguard!

Either a new hack is out, or someone is constantly bypassing under another identity (ingame name + IP), cause this is the 3rd bypasser I have seen this month, only problem is I couldn't retreive their IP's due to a malfuncioning brenbot.

Reckneya.
