wenn is "if", not "when".

"Hi, if I install RenGuard and join a server XXXXXXXXX but then the game locks up if I XXXXXXXXX. That only happens if I install RenGuard."

that's the most I can get out of it. I don't translate it word for word, for I understand German grammar. But obviously my German vocabulary sucks. Goztow, maybe you can explain the parts I don't understand? just for learning experience...
