UACFkurry wrote on Sat, 22 July 2006 04:13When I start up renguard I first get Trying to connect, then secure link, then Welcome to launch.. Etc, then to launch click renegade etc, BUT then I get insteed of nothing and just started renegade: There are errors! Disconnecting, disconnected from renguard network..
You can disable CorePatches through the options screen.

Or you can complain to jonwil about how his CorePatch 2 installer sucks.
