---

Which is not a problem in my case:

AMD 2400+

Asus A7V333

512MB pc2100

Geforce 3 Ti 200 128mb

70GB total space

the works.

(Hopefully to get the Geforce FX 5900 - it owns the Radeon 9800 in most tests and is quiet, not loud like the 5800.)
