gray174greetings to my fellow ren-addicts. I've been reading this board off and on since ren was released. Lots of great information here.

Can a few of you guys post your favorite mod maps. I had to re-install and lost my collection. I just want a few of the most common (best multiplayer maps) on my machine.

thanks in advance and see you on the battlefield,

I think you need to read some more. One thing you need to learn is that we don't talk like "greeting to my fellow ren-addicts" :rolleyes:

But if you want maps then go to google and search for them. But if you don't even know what the names are then you're screwed. But one good map is called "beach". Go to google and search for "C&C beach".
