Well, I definitely still play Renegade when I'm not busy doing something else (which is quite often). You'll probably find me playing at my clanserver.

I also mod Renegade, I make sounds for C&C Reborn.

I'm actually one of the Renegade oldies, I've been playing the game since the Renegade demo, which is about four and a half years ago.

I have a lot of the newer FPS games, and an Xbox360, but I often find myself coming back to C&C Renegade after playing a different game. Call me crazy, but I think Renegade is one of the most unique multiplayer experiences ever.

Still surprised no other game really pulled off a "c&c mode". CTF and DM get way too boring.
